

Art about Mathematics

Introduce:

Maurizio PAOLINI

Università Cattolica del Sacro Cuore

Interviene:

Rinus ROELOFS

Mathematical artist

Abstract:

As an artist I try to make my fascination about mathematics and mathematical structures explicit by making artworks. More and more these models are used to explain something about mathematics. So it works in two ways: making mathematical structures visible can lead to objects with which mathematics can be understood and this again can cause new developments in mathematics.

Seminario

Mercoledì 6 giugno 2018

Sala Riunioni, ore 14.30

Via dei Musei 41 - Brescia
