SOCIAL GENERATIVITY

*What it is
and what it is good for*

International Conference

11-12 October 2018
Aula G.127 Pio XI
Largo A. Gemelli, 1

UNIVERSITÀ
CATTOLICA
del Sacro Cuore

The recent publication of the book *Social generativity: a relational paradigm for social change* (Routledge, 2018) represents an excellent opportunity to gather some among the most authoritative scholars from all over the world for an international debate.

Social generativity, a sociological paradigm based on empirical studies in the Italian context, has grown popular in recent years as a key concept to interpret the origin of 2008 crisis and to identify new positive ways out of it.

In particular, the conference will explore key analytical dimensions (11 October, morning), theoretical foundations (11 October, afternoon) and policy implications of the concept (12 October).

11 October 2018

H 9.45 Welcome address

Giancarlo ROVATI, Director of the Department of Sociology, Università Cattolica del Sacro Cuore
